PROFILE

Experienced Software Engineer with advanced skills in Laravel and Vue.js, specializing in full-stack web development. Proficient in building scalable APIs, dynamic UIs, and handling background job processing with tools like Laravel Horizon and Docker. Skilled in integrating third-party libraries, working with custom authentication, and developing real-time systems. Currently expanding expertise in Next.js, Tailwind CSS, and Framer Motion for modern, interactive web apps

EXPERIENCE

Software Engineer   📅 Jun 2024 - Apr 2025

Core Support Hub | Bacolod, Philippines

- Collaborated on the development of a workspace management system for a coworking space business, utilizing Laravel, jQuery, and a MySQL database as a full-stack engineer.
- Contributed to a Raffle Draw Management System for a client, incorporating QR code generation and management of raffle entry and retail store and raffle draw using Laravel and jQuery deployed in AWS.
- Assisted in the development of a SaaS project offering multiple products, employing Laravel, Vue.js, and MySQL for scalable solutions.
- Design and build the company's website, implementing front-end solutions with Next.js/React.js and back-end services in Django, integrated with a PostgreSQL database and deployed on Vercel.
- Contributed in the developement of an ERP system's CRM module using ASP.NET, leveraging stored procedures with an SQL database to optimize business operations.
- Created a custom attendance tracker for the company, featuring QR code scanning functionality using React.js/Next.js, Django, and PostgreSQL.
- Developed a mass mailing tool for the sales team, streamlining bulk email tasks with an intuitive Laravel-based interface.

Web Developer   📅 Aug 2022 - Oct 2024

Freelancer | Bacolod, Philippines

- Management System with Geolocation Developed a waste management system using Laravel, jQuery, and MySQL for a Capstone Project. Features include real-time garbage truck tracking, entity management, and data analytics.
- Government Information System Built a student government system using Laravel, jQuery, and MySQL. Includes event management with geolocation, online elections, and student record management.
- Math Game for Children (Android) Developed an Android-based math game featuring a scoring system and multiple-choice Q&A to enhance children's math skills.

Software Engineer Intern   📅 Feb 2024 - May 2024

Core Support Hub | Bacolod, Philippines

- Contributed to the development of a Coworking space management system while learning Laravel, JQuery, Bootstrap and also while learning Git Version Control
- Contributed to an Erp module Using ASP.NET C# while learning and understanding it
- Also learned how to manage servers such as Cpanels and Ec2 Instances Ubuntu Servers for deployment
